One- and three-card holders

Keeps your badge  
or card safe from  
bends and creases!

# B•Holder™

## One- and three-card holders

The B•Holder is a top-load, rigid plastic card holder available in both one-card and three-card formats. Made of ABS plastic and polycarbonate, the B•Holder will stand up to the rigors of daily use. The one-card B•Holder holds a single 30-mil card, while the patented three-card holder can hold a 30-mil card in the front and either two 30-mil cards or a 60-mil card in the back. The front of each B•Holder features a frosted finish that allows the face of the front card to remain visible. The one-card B•Holder features a convenient thumb notch that makes it simple to slide a card out for use, while the three-card B•Holder features two convenient levers that slide cards out with ease.

**Convenient** – The B•Holder’s ability to both protect cards and keep them easily accessible for scanning or swiping makes it the ideal holder for cards of all kinds.

**Durable** – The B•Holder’s polycarbonate construction provides rigid, secure protection against spills, bends, creases and more. The frosted front helps protect a card from fading and light damage.

**Secure** – The holder uses top-load functionality, eliminating concerns about cards sliding out of the holder. A convenient slot makes it easy to attach the holder to its user with a lanyard or strap clip.
